

Evgenii Kuleshov

QA Engineer

I'm a QA engineer with 5+ years of experience. Worked in large IT companies in Russia: Luxoft, Raiffeisenbank, Kaspersky, etc. I have good experience in testing (web, Rest API), as well as some experience in testing desktop and mobile applications. I am flexible and quickly join the team. I have experience working with Agile methodology (Scrum/Kanban). I am developing in the direction of test automation. I am taking java courses at Hyperskill. I currently live in Valencia and am looking for a job in Spain or remotely.

Experience

Aug 2021 - Jul 2023

Innotech | St Petersburg City, Russia

Senior QA Engineer

Performing all types of testing for the web portal and API back-end services based on microservice architecture. Distribution and control of testing tasks in the team.

Coordination and compliance with the assessment / deadlines for the completion of tasks for testing. Carrying out UAT testing and fixing the results. Maintaining test documentation, test plans, reports. Collaboration with the development team during the design phases

Sep 2019 - Jul 2021

Kaspersky | St Petersburg City, Russia

Middle Test Engineer

Performing all kinds of testing for the web portal. Test design of new functionality and support for existing test cases.

Layout testing using DevTools tools and application testing on emulators and physical devices (Android, iOS)

Release process management (Launch, analysis of results and support of autotests). Data emulation using Json, XML requests. Working in multiple teams.

Aug 2018 - Sep 2019

Raiffeisen Bank Russia | Omsk, Russia

Middle Test Engineer

Testing of all integration processes of banking products (server services). Perform functional and regression testing on an ESB project. Support for the operability of banking application integration services. Log analysis in ELK Kibana and bug reports. Preparation of reports on the progress of testing. Working with queues: creating/deleting queues, granting rights. Execution of XML, JSON requests (SOAP, REST). Testing the integration of a banking web service

Nov 2017 - Aug 2018

Luxoft | Omsk, Russia

Junior Test Engineer

Testing a suite of desktop applications for a large retail system. Perform functional, regression, integration and smoke testing. Working with defects in JIRA (Introduction, tracking). Working with databases and writing SQL queries (SELECT, UPDATE, INSERT). Test design of new functionality and support for existing test cases

Achievements

- At my last job, I helped to successfully launch two web portals to increase the flow of applications to the bank.
- Successfully moved with my wife and cat to Spain.
